Slide 2: Vision & Mission

Our Vision:

To empower businesses across Southeast Asia by delivering scalable, innovative, and high-quality software solutions that drive digital transformation.

Our Mission:

- Build exceptional software that solves real-world problems.
 - Foster long-term partnerships with clients through transparency and excellence.
 - Continuously innovate with cutting-edge technologies and best development practices.
 - Grow a strong Indonesian tech ecosystem and talent pipeline.
-

Slide 3: Problem Statement

Common challenges companies face in digital projects:

- Lack of reliable development partners who understand local market nuances.
 - Poor project transparency and communication leading to missed deadlines.
 - Overpriced services with limited ROI on software investments.
 - Difficulty scaling software due to poor architecture or outdated tech.
 - Challenges finding seasoned full-stack developers who handle end-to-end solutions.
-

Slide 4: Our Solution

Devscale Indonesia offers:

- End-to-end software development from ideation, design, development to deployment.
 - Expertise in Full-Stack Development ensuring seamless integration of frontend and backend.
 - Agile and transparent workflows with continuous reporting and client collaboration.
 - Cost-effective, scalable solutions tailored to the Indonesian market and beyond.
 - Post-launch maintenance and scaling support.
-

Slide 5: About Us

Founder: Indra Zulfi

- 10+ years in software industry specializing in product strategy and operations.
- Previously led multiple successful startups and tech projects in Indonesia.

Full-Stack Developer: Reza Rinaldi

- Expert in JavaScript frameworks (React, Vue), Node.js backend, and cloud deployments.
- Passionate about clean code, architecture, and scalable apps.

Full-Stack Developer: Jessy Hanifah

- Skilled in Python/Django, REST APIs, modern frontend technologies, and DevOps.
 - Focused on building fast, secure, and efficient software products.
-

Slide 6: Market Opportunity

Indonesia Digital Landscape:

- Internet users: 210M+ (one of largest globally).
- Government pushes for “Making Indonesia 4.0” - strong digital economy growth.
- SMEs & startups digital adoption increasing annually by 20%+.
- Demand for custom software solutions projected to grow \$2B+ in next 5 years in Indonesia alone.

Target Market Segments:

- SMEs seeking digital transformation.
 - Startups requiring MVP and product scaling.
 - Enterprises upgrading legacy systems.
 - E-commerce and fintech sectors booming rapidly.
-

Slide 7: Our Services

1. Custom Software Development

- Web & Mobile Apps (React Native, Flutter, etc.)
- SaaS platforms
- Enterprise portals

2. Product Design & Prototyping

- UI/UX Design
- MVP Rapid Prototyping

3. Maintenance & Support

- Bug fixing, monitoring, performance optimization
- Feature enhancements and scaling

4. Consulting & Strategy

- Technology audit and roadmap creation
 - Cloud migration and DevOps Automation
-

Slide 8: Technology Stack

Frontend: React, Vue.js, Angular

Backend: Node.js, Python (Django, Flask), GoLang

Mobile: React Native, Flutter

Database: PostgreSQL, MongoDB, MySQL

Cloud: AWS, Google Cloud, Azure

Tools: Docker, Kubernetes, GitLab CI/CD, Jenkins

Our expertise ensures use of leading-edge technologies with focus on scalability, maintainability, and security.

Slide 9: Our Work Process

1. **Discovery & Planning**
 - Stakeholders workshops
 - Requirement gathering
 - Technical feasibility and roadmapping
 2. **Design & Prototyping**
 - Wireframes and UI/UX design
 - Interactive prototypes for validation
 3. **Development & QA**
 - Agile sprint cycles
 - Continuous integration & automated testing
 4. **Deployment & Maintenance**
 - Production deployment with monitoring
 - Ongoing support & feature rollouts
-

Slide 10: Why Choose Devscale Indonesia?

- **Local Expertise, Global Standards:** Understanding Indonesian market combined with best international development practices.
 - **Full-Stack Team:** In-house experts handling entire product lifecycle.
 - **Transparent & Agile:** Continuous collaboration and clear communication.
 - **Competitive Pricing:** Tailored packages for startups to enterprises.
 - **Quality Assurance:** Rigorous code reviews and testing procedures.
 - **Post-Launch Support:** Comprehensive SLAs for uptime and issue resolution.
-

Slide 11: Case Studies (Sample Projects)

1. E-commerce Platform for Local SME

- Developed scalable React & Node.js platform integrated with local payment gateway.
- Resulted in 40% increase in online sales within 6 months.

2. Fintech Startup MVP

- Built secure mobile app on React Native with backend API in Django.
- Assisted in product launch that attracted \$500K seed funding.

3. Enterprise Workflow Automation

- Migrated legacy ERP to cloud-based workflow management system.
 - Reduced processing time by 50% and improved data accuracy.
-

Slide 12: Client Testimonials

"Devscale Indonesia delivered exactly what we needed, on time and on budget. Highly recommend their team!"

– CEO, Local E-commerce Brand

“Reza and Jessy’s expertise really made a difference in scaling our MVP quickly without compromising quality.”

- Product Manager, Fintech Startup

“Indra’s leadership and the Devscale team’s professionalism were crucial to our digital transformation.”

- COO, Manufacturing Enterprise

Slide 13: Business Model

Revenue Streams:

- Project-based development fees.
- Monthly retainer contracts for maintenance and support.
- Consulting and technology strategy engagements.

Pricing Strategy:

- Flexible packages depending on project complexity and client size.
 - Subscription options for ongoing SaaS development and support.
 - Competitive pricing aimed at SME and startup affordability.
-

Slide 14: Go-To-Market Strategy

- **Local Partnerships:** Collaborate with Indonesian tech hubs, accelerators, and incubators.
 - **Content Marketing:** Publish whitepapers, blogs, and tech talks showcasing expertise.
 - **Networking:** Participate in regional tech conferences and workshops.
 - **Referrals & Client Success Stories:** Leverage satisfied clients to gain new leads.
 - **Outbound Sales:** Target SMEs and startups with consultative selling approach.
-

Slide 15: Competition Analysis

Competitor	Services	Market Focus	Strengths	Weaknesses
Local Agency A	Custom Web & Mobile	Indonesia SMEs	Regional experience	Limited tech stack diversity
Global Agency B	Enterprise software	Large enterprises	Established brand	High cost, less flexible
Freelancer Network	Project-based tasks	Various	Cost effective	Inconsistent quality
Devscale Indonesia	Full-stack software dev	SMEs to Enterprises	Agile, transparent, affordable	Emerging brand, scaling team

Slide 16: Financial Projections (3 Years)

Year	Revenue (USD)	Expenses (USD)	Net Profit (USD)
Year 1	150,000	100,000	50,000
Year 2	350,000	200,000	150,000
Year 3	700,000	400,000	300,000

Key Assumptions:

- Steady client acquisition rate of 3 new projects/month.
- Gradual team expansion from 3 to 7 developers by Year 3.
- Increasing retainer and consulting contracts.

Slide 17: Funding Ask

Seeking: \$250,000 Seed Round

Use of Funds:

- Expand development team (hire 4 more developers).
- Marketing and business development.
- Infrastructure and tool investments for efficiency.
- R&D for AI and machine learning capabilities integration.
- Establish training programs to upskill local talent.

Slide 18: Our Roadmap

Next 12 Months:

- Build brand awareness & secure 20 new clients.
- Launch Devscale Academy initiative - training local dev talent.
- Initiate AI-powered product module R&D.

Year 2:

- Scale team to 7-10 developers.
- Expand service offerings to include AI/ML and blockchain consulting.
- Enter the Southeast Asia regional market.

Year 3:

- Become leading full-stack software agency in Indonesia.
- Establish strategic partnerships with tech giants and government initiatives.

Slide 19: Team Overview

Name	Role	Experience & Strengths
Indra Zulfi	Founder & CEO	10+ years in product & business strategy, startup leadership, Indonesia market expert

Reza Rinaldi	Senior Full-Stack Dev	Expert in JS frameworks, Node.js, cloud, scalable architecture
Jessy Hanifiah	Full-Stack Developer	Proficient in Python/Django, frontend, REST API design, DevOps
